~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 8702
Date of Session	: 22Jan87
Date of Report	: 29Jan87
Source Identifier	: 003

1. (S/NF/SK) Tasking: See original tasking data sheet (attached). Per ops officer, source had probably acquired the site during his last session, but not necessarily the correct target building; more data needed.
2. (S/NF/SK) Session: Session result should be discounted; monitor, while waiting for source to arrive, attempted to remote view the site, thereby overlaying the session (at least subconsciously) with signal line noise. Also, monitor interrogated source during this session, disturbing structure.
3. (S/NF/SK) Summary: AOL Drive (probably monitor-induced) of "high tech composite aircraft/secret project".
4. (S/NF/SK) Feedback: None provided source.

~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT

DECLASSIFY : OADR

Project FY 8702

Interviewer/Monitor Tasking

1. Describe the structure known as "Building C".
SG1A

Note: "Building C" is in a complex of other lettered (A, B, etc.) buildings. "Building C" is "the most unusual at the complex."

2. To be announced

have any.

like a couple structures combined in one. smaller
"dense" structure w/ smaller rooms attached internally to larger
"spacier" structure w/ a few a one large room.

function

S4 1/2 function seems to be integrated effort (all's engineering, design, prototyping, production) to go from concept to final product; not volume production but first prototype production.

Summary

Site involves large flat open areas reminiscent of
 a field, w/ large + small structures associated. Site occupies
 extensive territory. One structure is notable large,
 but seems an ~~amalgamation~~ amalgamation of a couple of
 structures into one for one overall purpose. ~~One~~ portion
 of structure is smaller "dense" - various small rooms with
 closer association of people. Other part is large +
 "Spacious" - consists of a few, or perhaps only one
 large "room" w/ bay. A ^{way} door that "rolls up" - like a
 German "Rolladen". This door is not used to admit
 constituent parts - They come through other doors.
 This door allows ingress + egress of finished
 product, which is light-green or white, smooth,
 tapered, curved, shiny painted part transparent
 with planes + surfaces that are curved, slopes
 slanted, ~~except~~ swept + angled. It moves
 smoothly along ground, but suggests strong AC
 + Aircraft.

Experimentation + semi-operations are element
 involved. Materials of object are hard, strong
 smooth, but don't sound metallic when struck.
